EDUCATION

Vellore Institute of Technology (VIT-C), *BTech Computer Science Engineering*

Sep 2022 – Jun 2026

- Relevant Coursework: OOPs, DSA, DBMS, OS, CN, AWS, Data Science and AI.
- Achievements: Semi-Finalist of BuildWithIndia Hackathon, Event Managers Club member, Toastmasters Club member

Navyug Convent Sr. Sec. School: *Higher Secondary School Certificate: 83%*

Mar 2022

Amity International School: *Secondary School Certificate: 90%*

Mar 2020

PROFESSIONAL EXPERIENCE

Frinks.AI — *Software Developer (SDE-1)*

Mar 2026 - Present

- Developed and shipped production features across the frontend and backend for enterprise AI products, collaborating with cross-functional engineering teams.
- Migrated core application workflows from Linux to Windows, resolving platform-specific dependencies.
- Refactored large code files into maintainable, modular components, reducing technical debt and improving code readability and extensibility.
- Designed and implemented internal Branch Drift and Release Drift tools for Git branch analysis and release tracking, streamlining engineering release workflows.
- Built and maintained containerized development environments using Docker and worked with MariaDB, Redis, and Caddy to support scalable application infrastructure.
- Contributed 250+ commits across 11 repositories, participating in code reviews, debugging, feature development, and release cycles within a collaborative Git workflow.

PROJECTS

TagBack: Find, Return and Earn (Lost and Found app)

Jun - Nov 2025

- Developed a full-stack gamified platform using React Native and Supabase, achieving 85–90% AI match accuracy for lost and found items. Built an AI-powered matching engine using vector embeddings (pg_vector, PostGIS, pg_trgm), reducing manual search time by 70%. Implemented a reward system with points and badges via SQL triggers, increasing user engagement by 40%. Deployed a scalable serverless backend on Vercel and automated AI embedding workflows using Supabase Edge Functions.
- Tech Stack: React Native (Expo), TypeScript, Supabase, Cloudflare Workers AI, Vercel, PostGIS, pg_vector.

AI-Powered Customer Churn Prediction & Retention Dashboard ([Live Demo](#))

Oct 2025

- Built an end-to-end machine learning pipeline to predict churn, identify key drivers, and recommend retention strategies. Developed an interactive Streamlit dashboard visualizing churn probabilities, SHAP-based insights, and actionable metrics. Executed the complete data workflow including ETL, preprocessing, feature engineering, model training, and visualization.
- Model metrics of 93% accuracy, 99% recall, 90% precision, and 94% F1-score.
- Tech Stack: Python, Pandas, Scikit-learn, XGBoost, SHAP, Streamlit.

CERTIFICATIONS

- Oracle Cloud Infrastructure 2025 Generative AI Professional (1Z0-1127-25), *Oracle*
- Machine Learning Specialization, *Stanford University & DeepLearning.AI (Coursera)*
 - Supervised Machine Learning: Regression and Classification Certification
 - Advanced Learning Algorithms Certification
 - Unsupervised Learning, Recommenders, Reinforcement Learning Certification

Other Certifications:

- AWS APAC - Solutions Architecture Job Simulation, by Forage
- Walmart USA - Advanced Software Engineering Job Simulation, by Forage
- Career Essentials in Generative AI by Microsoft and LinkedIn
- DBMS course, by Scaler

SKILLS

Languages: Python, Java, JavaScript, TypeScript, SQL

Software Engineering: Data Structures & Algorithms, Object-Oriented Programming, REST APIs, Git, Code Refactoring, Debugging, Cross-Platform Development, Software Design

Frontend: React.js, Next.js, React Native, HTML, CSS, Tailwind CSS, Responsive Design

Backend & Databases: Node.js, Supabase, PostgreSQL, MariaDB, Redis

Cloud & Infrastructure: Docker, AWS, Linux, Windows, WSL, Caddy, Vercel

AI & Developer Tools: Claude, GPT, Google Gemini API, Scikit-learn, XGBoost, SHAP, Pandas, Vector Embeddings (pgvector)
